

Milcombe Parish Council

Comments on the "Planning for Cherwell" Paper 2

The document as a whole is vague and doesn't get down to specific aims and objectives, so the main comments are on the Key Objectives on pages 25, 26 and 27.

KO 1 - This should read: Allocate sufficient **suitable** land to meet etc. etc.

KO 10 to 19 - Nothing about reviewing current planning applications to include such things as increased insulation standards, the provision of electric vehicle charge points, the use of heat pumps and the requirement to integrate solar panels into the design.

KO 20 to 31 - Nothing about Waste Management, for example the separation of Surface Water and Sewerage to stop raw sewerage discharges in to rivers etc.
